

OUR APPROACH

IMPROVING ACCESS AND QUALITY OF BEHAVIORAL HEALTHCARE THROUGH TECHNOLOGY

Arcadian Telepsychiatry, a wholly owned subsidiary of Telemynd, Inc., has been providing a technology enabled approach to behavioral health since 2013. With an established national network of providers, ranging from Psychiatrists, Psychiatric Nurse Practitioners, Therapists, and Social Workers, Arcadian can provide a range of tele-health solutions.

Turnkey Collaborative Care Model (CoCM)

- CMS introduced 3 CPT codes that can be billed on a monthly basis for patient's that are being managed under this program.
- Telemynd partners with primary care offices to provide a turnkey solution to provide collaborative care services.

Virtual Psychiatric Office

- The Telemynd telepsychiatry solution is designed to integrate with primary care offices and clinics to provide seamless access to behavioral health specialists.
- The Telemynd technology platform allows for the primary care office to integrate scheduling, patient data and prescriptions into their existing workflow.

On Demand Telepsychiatry

- On-demand access to a psychiatric specialist to support patients in an acute care, skilled nursing, nursing home or emergency / urgent care environment.

Teletherapy

- National network of licensed therapists and social workers that can provide services in a clinic environment or directly to the patient.
